

AKSHAT AUDICHYA

Digital Business Analyst

akshataudichya.uk@gmail.com | 07823721056 | United Kingdom

PROFESSIONAL SUMMARY

Business analyst with around 2 years of experience turning messy operations and unclear requirements into clear processes, structured reporting, and actions that actually get closed. Comfortable working directly with stakeholders across business, finance, and technical teams, and used to running several workstreams at once.. Strong hold on Excel and process mapping, and currently building SQL proficiency. Keen to bring this analytics-and execution mix into a fast-paced, high-ownership operations role.

WORK EXPERIENCE

Business Analyst

Nov 2025 – Present

Freelancing

- Assessed operational gaps and unclear requirements within a booking platform, leading process analysis and stakeholder discussions to define scope and improve workflow efficiency across an end-to-end solution.
- Documented business requirements, process maps, user stories, workflow logic, and acceptance criteria, ensuring clear project governance and alignment between business and technical teams.
- Coordinated workshops, supported UAT activities, and collaborated with developers on integrations, APIs, and delivery updates to ensure successful implementation and issue resolution.
- Delivered a fully functional platform that improved system consistency by 16%, reduced user friction by 25%, and strengthened operational reporting and service delivery.

Market Research Intern

Feb 2025 – March 2025

The Online Dating and Discovery Association

- Reviewed fragmented workflows across three teams, identifying governance gaps, duplicated processes, and operational inefficiencies affecting project delivery and communication.
- Conducted stakeholder engagement sessions to capture As-Is and To-Be processes, producing structured documentation, process maps, and workflow records using Visio.
- Supported workshop facilitation, UAT coordination, approval tracking, and project documentation activities to ensure smooth implementation and transition into BAU operations.
- Improved process clarity and stakeholder alignment by 10%, helping accelerate decision-making and improve coordination across multiple workstreams within four weeks.

Research Analyst

Aug 2024 – Nov 2024

Arcgate Technologies

- Analysed complex datasets and reporting inconsistencies impacting operational visibility and decision-making across multiple international client projects.
- Gathered reporting requirements, defined KPIs, and performed root cause analysis to improve reporting governance, data accuracy, and performance monitoring processes.
- Coordinated with stakeholders to prepare structured reports, track deliverables, validate outputs, and maintain accurate documentation across concurrent workstreams.
- Improved reporting accuracy by 10% and reduced manual effort by 15%, enabling more reliable operational reporting and supporting data-driven decision-making for three international clients.

SAP ABAP S/4 HANA Development intern

Nov 2023 – July 2024

Diligent Global Tech Consultancy

- Supported business process inefficiencies where requirements and technical solutions were misaligned within SAP systems for Malaysian Airlines.
- Translated business requirements into structured technical specifications, ensuring clarity, traceability, and alignment with delivery and compliance expectations.
- Collaborated in agile teams to develop integrations, supported test case design, UAT execution, and defect resolution, ensuring governance standards were met.

EDUCATION

Btech in Computer Science

Rajasthan University

- Final CGPA: 8.64

July 2020 – July 2024

My degree developed my foundation in data structures, database systems, and software development, giving me a structured approach to problem-solving and a practical understanding of how technical systems are designed, built, and maintained.

SKILLS

- Project Coordination
- Project Administration
- SQL
- Stakeholder Management
- Change Management
- Progress Reporting
- Risk & Issue Tracking
- Project Documentation
- Microsoft Excel
- Microsoft Office Suite

Master in Management

University of Liverpool

- Final CGPA: 7.05

Jan 2025 – Jan 2026

My Master's has strengthened my understanding of business analytics, project management, and managerial decision-making, with a focus on applying structured analysis to real-world problems and aligning data insights with practical business outcomes.

- Report Writing
